

Use of AI Tools in OS Section-A Assignments

All rules mentioned in this policy apply to each individual student in a group assignment. Failure to follow any rule will be counted as plagiarism for each group member

● What is Permitted

- Assistance with brainstorming
- Improving your understanding of the assignment
- Debugging and diagnosing compilation/runtime errors
- Learning concepts, syntax and library usage
- Generating/adapting small code snippets **excluding** the core logic

● Mandatory Disclosure for AI usage

- You must submit a detailed document with each assignment listing out each and every code snippet generated using AI tool
- You are fully responsible for any AI generated code snippet used in your assignment, including its correctness and integration
- You must be able to explain and justify all submitted code including the AI generated code snippet
