

Course Work: Cognition of Motor Movement

Semester: Monsoon 2026

Assignment No.1

Total Marks: 15

Due Date: 11th September 2026 (Friday)

Please read the instructions carefully until the end of the document

ASSIGNMENT:

Write a short paper on **any one** of the following topics:

1. Artificial Neural Networks
2. Mirror Neurons
3. Motor Unit and Cognition
4. Servo Mechanism and its implications in Motor Cognition

The paper should not be more than 500 words and should have the following three paragraphs:

1. **Introduction:** This should have a comprehensive background sufficient to understand the topic chosen.
2. **Review:** This paragraph should highlight the development(s), area of research or other relevant information in the field or topic you have chosen.
3. **Conclusion:** This paragraph should be your perspective for the topic and its application in the development and betterment of the society.

NOTE:

- Please try to be within the word limit. There will be negative marking for violating the word limit (+/- 50 are acceptable)
- All assignments will be checked for plagiarism before evaluation, thus you are encouraged to check for plagiarism before submission via tools (Grammarly etc.) provided by IIITD library.

- For assignment with $> 15\%$ **non-AI plagiarism**, students will be given a time period of 2 days (after return of assignment to them by TAs) to resubmit their assignment. If they fail to do so or choose not to resubmit then they will be reported to the academics for further action.
- For assignments with $> 15\%$ of **AI plagiarism**, students will be directly reported to academics without exception.

Please find the detailed rubric below. If you have any questions, **please contact your respective TAs**. All the best!

RUBRIC

Ideal Word Distribution:

Introduction ~ 200 words

Review ~ 200 words

Conclusion ~ 100 words

All this excluding citations

1. Introduction:

- Clear definition of the topic
- Figure if necessary to express the idea (the figure should be cited)
- Technical terms explained

2. Review:

- Highlight the studies.
- The studies should address an aspect of the topic.
- They should not be a compilation of studies that have keywords.

3. Conclusion

- Definition of the topic and one/two sentences of your conclusion as to what aspects it addresses of the topic and how?
- Abstract discussion will be marked average → 3 marks
- How well you have described the implications of the topic in societal development. Maybe your ideas no matter how unachievable they are.
